

Dorgard

We've opened the door to safer buildings

Wedging open fire doors is dangerous. Dorgard is a wireless solution that legally holds open fire doors, and enables them to close when the fire alarm sounds.

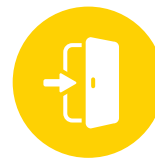

Benefits

A safe alternative to door wedging

Wire-free technology — no costly hard-wiring required

Enables greater access throughout the building

Improves ventilation within a building

Meets all regulatory requirements

Easily installed in under five minutes

Dorgard

Dorgard enables you to legally and safely keep fire doors open. When the fire alarm sounds, Dorgard releases, enabling the fire door to close, preventing the spread of fire and smoke.

Installed onto the bottom of the fire door in under five minutes, Dorgard is listening for a continuous fire alarm of 14 seconds or more.

Dorgard is a wireless system, so there is minimal disruption.

“ They cause no disruption and are easy to install and maintain. They’re just a good, reliable, discreet product that helps us to meet fire regulations. ”

Terry Morton, Hotel Owner

“ There are loads of advantages to this product — it provides easy access and allow people to be independent as they don’t have to call for help or assistance to open the doors. ”

Cameron Robins, Checkfire
