

Compliance Made Easy

Germgard[®]

Germgard is a smart sanitising system, designed to promote good hygiene practices to building users. Using digital signage, it alerts users to sanitise their hands before gaining entry. Germgard can be used as a stand-alone system or it can be integrated with electronic door locks, automatic doors, and access control systems.

Overview

Germgard uses a Passive Infrared (PIR) Sensor which detects when a person is approaching the door. The connected screen will display a message to remind the building user to sanitise their hands.

When the user sanitises their hands, a customised message will appear and the door will open to allow entry.

Features

- Visual evidence of a return to work strategy
- Reactive digital display
- Access control/electronic lock integration
- Customisable home screen
- Bespoke sanitiser with bladder refill
- Suitable for high-risk hygiene areas
- Energy harvesting technology
- Connects into any HDMI screen (supplied)

872-7202	Germgard
Germgard consists of:	
	Germgard Controller
	Germgard Sanitiser Unit
	Germgard PIR Sensor
	Germgard Screen
