

Freedor Pro

Makes opening heavy fire doors effortless

Freedor Pro takes the weight out of heavy fire doors and allows you to keep them placed open at a convenient angle with its free-swing feature. In the event of an emergency, ProHub will activate the Freedor Pro via radio signal to close all doors, preventing the spread of smoke and fire.

Benefits

Expandable system - add new Pro units at any time

Controlled by a hard-wired ProHub - not affected by background noise

Suitable for all areas including corridors, kitchens and stairwells

Improves access for those with mobility issues

Compatible with all alarm panels

Peace of mind with a two-year warranty

Freedor Pro

Freedor Pro is radio-controlled by ProHub which is connected directly to your fire system. This makes it suitable for high-risk areas.

ProHub has the optional add-on for Site Manager, our monitoring software. You'll be able to see your whole Pro system status from your internet device!

Available in gloss silver, brass and white or in matte black.

“ Well, it's made life a lot easier for me and I don't have the pain that I used to have now that the Freedor Pro is fitted. I just walk in. ”

Rita, Retirement Home Resident

“ Freedor Pro ticks all the boxes for the fire regulations and makes it easier for the residents to get about. ”

David Price, Maintenance Manager
