

Enhancing Accessibility and Fire Safety at Luton Central Mosque

Site overview

Sector: Religious/Community Organisation

Fireco Solution: DorMag Pro

Customer requirements:

- A Reliable Fire Door Solution for High-Footfall Spaces

Luton Central Mosque in Bedfordshire is a busy community hub serving worshippers and the wider public throughout the day. The building experiences high footfall, particularly during daily prayers, Friday prayers, Ramadan, events, and community activities.

Managing fire doors during busy periods was challenging

“Prior to installing Fireco door retainers, managing fire doors during busy periods was challenging,” explains Qasim Hussain, Office Manager at Luton Central Mosque. “Fire doors needed to remain closed for fire safety, but this restricted the flow of people, caused congestion, and made access difficult - particularly during peak prayer times and large gatherings. Propping doors open was not a safe or compliant option.”

A balance between fire safety and free-flowing access throughout the building needed to be found.

“Our experience has been very positive. The Fireco products work exactly as intended: they keep doors open to improve access and movement, and they close immediately when the fire alarm is triggered. This has significantly improved safety, accessibility, and the overall flow of people within the building.”

Qasim Hussain, Office Manager at Luton Central Mosque.

The issues affected worshippers, staff, volunteers, and visitors, especially the elderly, families with children, and those with mobility needs. It also created operational challenges for staff managing crowd flow during busy periods.

DorMag Pro was installed to improve accessibility throughout the Mosque.

Integrating DorMag Pro for Safe, Automatic Fire Door Control

“Fireco offered a compliant, reliable, and well-designed solution that allowed fire doors to remain open safely while automatically closing when the fire alarm is activated,” continues Qasim. “Their products have a strong reputation and are particularly well suited to busy public and community buildings.”

“Installing the DorMags has made a noticeable difference to the operation of the mosque. It has improved accessibility, reduced congestion during peak times, and provided reassurance that fire safety is never compromised. The DorMag Pro system has proven to be an ideal solution for a busy community building like ours.”

DorMag Pro forms part of the Pro System that, in the event of a fire, allows all doors to be released to close at the same time.
